

THINKPAD X41 TABLETS

Ultimate mobility in a versatile ultraportable

HIGHLIGHTS

Introducing the smallest and lightest 12" convertible tablet. It starts at only 28.96mm¹ (1.14") and 1.61kg² (3.5 lb).

Integrated Fingerprint Reader and Embedded Security Subsystem on select models combine to create the most secure tablet available. No other manufacturer offers stronger security as a standard feature.

It shares a compatible software image with select ThinkPad® X41, T43, and R52 models, helping make rollouts and integration painless.

It delivers the longest standard battery life of any 12" convertible tablet—up to 6.3 hours of battery life^{3,4}.

Write on the screen or type using the legendary ThinkPad keyboard.

With a full complement of ports and slots, this tablet has the flexibility you need.

Share common accessories and docking solutions with ThinkPad X40 and X41 notebooks.

So many gifts in one little package.

The ThinkPad X41 Tablet provides full tablet and notebook functionality without sacrificing battery life, keyboard, portability, docking, accessories or screen size.

Select ThinkPad X41 Tablets feature an Integrated Fingerprint Reader that can combine with Password Manager and the ThinkVantage™ Embedded Security Subsystem to authenticate with a fingerprint and a single password instead of multiple passwords. Administrators can also take advantage of the Reader to implement strong security policies and to help users more easily meet ongoing password requirements. Security software is preloaded for more out-of-the-box convenience.

To help decrease expenses, look inside for ThinkVantage Technologies and ThinkVantage Design elements. You'll see how to work more confidently and efficiently—and gain more time to focus on strategic goals.

THINKVANTAGE TECHNOLOGIES AND DESIGNS

Deploy the most secure wireless ultraportable tablets in the industry

with a bi-directional Integrated Fingerprint Reader, the Embedded Security Subsystem 2.0 and built-in Wi-Fi wireless. They offer built-in hardware and preloaded software-based protection. No other manufacturer offers stronger security as a standard feature.

Support your mobile workforce

with ThinkPad X41 Tablets and ThinkVantage Access Connections software. It's the easiest way to switch between wired and wireless networks.

Improve signal reception

with the ThinkVantage UltraConnect™ Antenna. To maximize range, this antenna is built into the display of ThinkPad X41 Tablets. Plus, it supports multiple frequencies to optimize coverage⁵.

Brace yourself. Like airbag technology, the ThinkVantage Active Protection System features built-in motion sensors. When a fall is detected, the hard disk drive temporarily parks itself. That makes it less likely that data on your hard disk drive will be lost because of some bumps or drops.

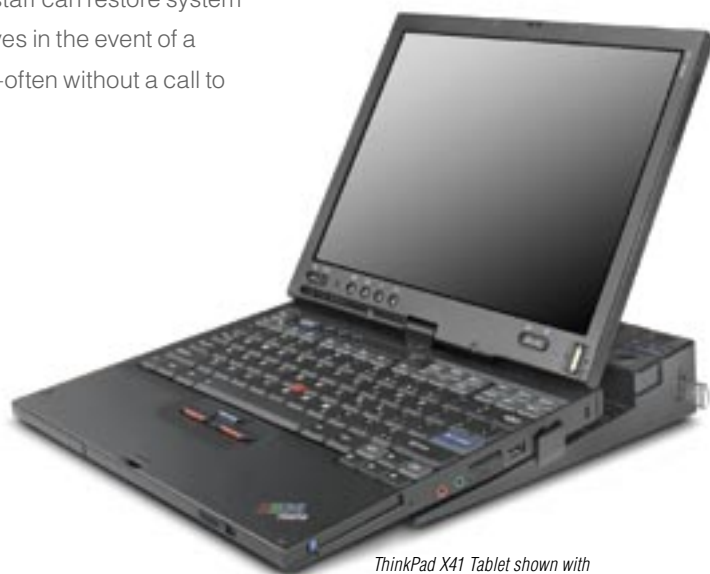

Put online⁶ and on-system information at your employees' fingertips with Blue button. With the push of a button, staff can gain answers to common IT questions by themselves.

Type more comfortably and efficiently with the full-size⁷ keyboard—a big advantage on an ultraportable.

Give your help desk a break.

Meet ThinkVantage Rescue and Recovery™ software. It's preloaded on ThinkPad X41 Tablets. With this enhanced, one-button solution, staff can restore system images themselves in the event of a software crash—often without a call to the help desk.

ThinkPad recommends Microsoft® Windows® XP Professional for Business.

THE ULTIMATE SECURITY AT YOUR FINGERTIPS

“The increased focus on system security for regulatory purposes leads us to predict that today's PC password standards will no longer be accepted in 2008,” according to the November 2004 *Gartner Research Note*, “Treat Passwords as Ineffective on PCs.” The report goes on to recommend that organizations requiring strong data protection should consider, among other things, trusted platform module (TPM)–enabled systems and, for systems subject to Sarbanes-Oxley controls, tokens or biometrics.

SERVICE IN SÃO TOMÉ? SURE.

Rely on award-winning Service and Support. Choose a ThinkPad X41 Tablet. With just a few clicks, workers can enjoy a wealth of on-system and online⁶ resources. Plus, they'll have support in more than 160 countries⁸ worldwide, from São Tomé to Sri Lanka.

ThinkPad X41 Tablet specifications

Machine types 1866, 1867, 1869
